

## Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an intercontinental organization consisting of Diesel Engines, Defense Industry goods, Industrial Vehicles, Construction Technologies and Machine Instruments and Mechanization Systems.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot manufacturing facility, which is the home of the Compact Equipment and Construction division. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Forklift division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer requirements.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent sellers moving lift truck supplies and materials handling equipment. This network enables Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably includes 63 different machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous truck models range from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest emerging forklift and lift truck company in the North American marketplace, thanks to its outstanding level of product performance and their persistently high level of customer support and service given to all Doosan Infracore Forklift users. The U.S. forklift division situated in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

In the beginning the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled lift trucks as part of a domestic equipment expansion venture. Product sales of these products were primarily targeted to state-run companies, large scale businesses, and the military. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Home-based lift truck trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a position of considerable growth of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the very competitive North American materials handling market. This joint-venture proved highly profitable for Daewoo and their forklift product sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a international sales system and started exporting models they had developed through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
