

Clark Forklift Part

Clark Forklift Parts - Currently, there are no less than 350,000 Clark lift trucks performing globally, and in excess of 250,000 in use in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive models of lift trucks, with parts covering more than 120,000 particular components for all of its automated equipment. Your regional Clark Dealer is your total source for availability of all your parts needs supplied by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently situated in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to offer the highest level of value and service to our clients, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Clark Totalift has a very impressive international support network. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the material handling market.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is at this time a customary feature on every lift truck.

Clark's relentless effort to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the world to be certified with the internationally accepted quality standard ISO 9001 for all of their production facilities. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a dominant market position.

Clark has chosen the very economical and beneficial system of "Lean Production" for its assembly facilities and use of resources. This structure was developed to acknowledge the most successful method of manufacturing facility stewardship and ensuring maximum efficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers communicate together to upgrade the efficiency and excellence of their products while minimizing expenses. The contemporary value engineering program combines modern product development and delivers improved customer support and service within the industry.
