

## Aerial Work Platform

Aerial Work Platforms - There are numerous accessories used for lift trucks that could be used so as to help expand the functionality of your forklift and allow you to pick up things, handle materials with out difficulty or to accomplish clean-up jobs.

Some accessories were specially designed for the forks themselves. For instance, blade extensions are used if you need more blade length, that increases lifting capability. Blade extensions come in lengths varying from forty eight to one hundred twenty inches. Triangular or rounded accessories are another kind used if transferring rolled material so as to ensure it does not roll off of the standard flat blades.

Lifting attachments could be pivoting and telescoping crane accessories. They come in many styles. These attachments are normally meant for moving lumber, metal bars, poles or any sort of bulky things. Additional accessories like for instance other kinds of hook plates and hooks are existing to be able to lift objects using a sling or chain. Magnetic lifters and slab lifters are other things that could be used along with hook attachments. Slab lifters are specialized attachments that are intended for carrying various materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that attach to your forklift to make transferring rolls of carpet easier. The accessory connects onto the lift truck's blades and has a pole that goes through the middle of the carpet roll.

There are numerous other types of lift truck accessories which could be used for facility maintenance like for instance snow forks. These blades attach to front end loaders and could move materials like for example dirt, soil and snow. Other common cleanup accessories comprise standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the lift truck forks connect onto for sweeping big spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal debris like on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up fast and easy.

Material spreaders are other attachments utilized on forklifts. These spreaders are handy for various applications like for example spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Work platforms are another optional lifting accessory which numerous companies utilize day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few units existing which are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location with the use of the lift truck. Larger platform units have additional space for employees to be able to carry tools and other necessary things intended for the task. Usually work platforms are constructed of poly material or steel.
