

Toyota Forklift Parts

Toyota Forklift Parts - In the U.S., Toyota Materials Handling inc., or TMHU, continues to be the top selling lift truck provider since 1992. Proudly celebrating more than 40 years of performance, the Irvine, California established company provides a wide-ranging line of quality lift vehicles. Resulting from their reputation of superiority, reliability, and resilience, Toyota remains prevalent in this competitive market. Quality is the cornerstone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are manufactured here.

Every one of Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to continual progress, and its environmental methods. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift trucks emit 70 percent fewer smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A.- Leading the Industry

Brett Wood, President of TMHU, links Toyota's accomplishment to its robust commitment to fabricating the best quality lift vehicles at the same time as delivering the utmost customer service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also called TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is among the magazines prestigious World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not a lot of other companies and no other lift truck maker can equal Toyota's record of caring for the natural environment while concurrently encouraging the economy. Environmental accountability is a fundamental feature of company decision making at Toyota and they are proud to be the first and only manufacturer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

Toyota originally released the 8-Series line of lift vehicles in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission principles, and California's more environmentally friendly emission standards. The finished product is a lift truck that produces 70 percent less smog forming emissions than the existing Federal standards tolerate.

Also starting in 2006, collectively with the Arbor Day Foundation, Toyota added to its dedication to the environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and local parks that were damaged by fires and other natural causes. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of sellers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift trucks offer better strength, visibility, efficiency, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS"•, helps limit the risk of mishaps and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability senses several factors that could lead to lateral instability and possible lateral overturn. When one of those factors are detected, SAS instantaneously engages the Swing Lock Cylinder to stabilize the rear axle. This transitions the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding strength.

The SAS systems were originally utilized on the 7-Series internal combustion lift trucks which were put on the market in 1999. These systems helped push Toyota into the lead for industry safety standards. Now, SAS is used on practically every new internal combustion products and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker training, overturn fatalities across all designs have decreased by 13.6% since 1999. Also, there have been an overall 35.5% reduction in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's uncompromising standards continue far beyond the machinery itself. The company believes in offering extensive Operator Safety Training services to help clients satisfy and exceed OSHA standard 1910.178. Training programs, videos and various resources, covering a wide scope of matters-from personal safety, to OSHA rules, to surface and cargo conditions, are offered through the seller network.

Ever since the sale of its first lift truck in the U.S. to the fabrication of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has continued a solid presence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America now are built in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of land. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service components, with the total investment exceeding \$113 million dollars.

The new NCC was built to operate for TMHU buyers and sellers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its originator, Sakichi Toyoda, in 1867, and lastly a training center.

The NCC embodies Toyota's commitment to providing top-notch customer service. TMHU's 68 authorized Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations all through the U.S, provide the most wide-ranging and inclusive customer service and support in the industry. The company's new and Licensed Used lift vehicles, service, components, and financing capabilities make Toyota dealerships a one-stop shop to guarantee overall consumer satisfaction.
