

Barrel Clamps

Barrel Clamps - A Barrel Clamp is really a mechanical or hydraulic accessory intended for a forklift. It could be utilized so as to clutch the object you would like to transport utilizing the forklift and is usually utilized for handling paper rolls, barrels, and kegs. Several types of barrel clamp accessories also have a rotate function. For example, the revolving function enables a forklift operator to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
