

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country trip in their RV. Newly retired, after spending numerous years working with his brother to build their crane company into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

During their journey, John reacquainted himself with former business connections along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite market for a product that could swiftly and safely lift people in the air to accomplish maintenance and other building services.

After returning from their vacation, John set up a partnership with two of his friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design elements of that original lift into current models.

JLG forklifts have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the business proudly continues to expand itself into various marketplaces worldwide and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer environment.
